Company, India National Counc Research, India	evelopment and Finance a; La Trobe University, Australia; il of Applied Economic a; University of Exeter, United ersity of Melbourne, Australia
Project Leader Scott Davenpor	
Program	Agribusiness
Project code	ADP/2011/021

## **Overview**

This project aimed to explain onion price rises and provide insights into the causes of food price inflation more generally.

The research was done from an agricultural policy perspective, focusing on market structure, price

formation and competition issues, and it included analytical modelling and field research involving surveys and statistical analysis of market price data.

## **Project outcomes**

Provided insights into why onion prices have risen dramatically in recent times.
