Project Leader

Aulia Perdana - World Agroforestry Centre

ACIAR Research Program Manager

Dr Nora Devoe

Program

Forestry

Project code

FST/2012/039

Indonesia, enhance value chains and marketing strategies, improve policy frameworks, and expand integrated timber and non-timber forest production systems.

Planting trees and managing non-timber forest products has been an important part of Indonesian farmers' livelihoods' strategies for a long time.

Smallholders could produce non-timber forest products. Trade volumes are small, but niche markets are likely to grow.

ACIAR is supporting research to develop opportunities for local communities, including developing timber and non-timber forest products silviculture practices, value chains and enterprises, policy framework, and extensions services, to support the informal non-timber forest products sector.

ACIAR

Overview

This project aimed to develop and improve integrated timber and non-timber forest production systems in
